

# Currency Rate Monitor

## Solomon IV Integrated Product

**Product Description:** Currency Rate Monitor is a program that automatically keeps Solomon's currency rates current by monitoring web sites that post foreign currency exchange rates. It keeps Solomon's tables updated based on a schedule of choice.

**Requirements:** Solomon IV v5.0, v5.5, v6.0, Customization Manager (CU)

**Product Availability:** Available Now

### Features/Benefits:

- ✓ Automatically updates Solomon's Currency Rate tables
- ✓ Accesses real-time foreign exchange data on the Internet
- ✓ Scheduler allows updates to occur as frequently as necessary
- ✓ Any number of currencies can be monitored
- ✓ History screen shows when updates have occurred and how rates have changed
- ✓ Monitoring process can be minimized to taskbar so workstation use is not impacted
- ✓ Can be run at any workstation or on a server
- ✓ Easy to install – Simple to setup
- ✓ Full functional demo available. No re-installation necessary after purchase
- ✓ Technical support and updates to future Solomon versions included in maintenance
- ✓ Additional web sites can be programmed for monitoring

**Pricing:** MS SQL Server: \$495  
1 year Maintenance (15%) required
