| Currency Rate Monitor | NA | NA | \$495.00 | \$74.25 |

Support:

- A 15% Maintenance Contract is required for the first year. It covers any upgrades or fixes to the software product for that period, as well as support via e-mail or telephone support (US and Canada only) for the product. Customers who are on current maintenance plans are entitled to one hour of free support per incident. If a support issue cannot be resolved in that time, you will be notified and billed for additional support. If the issue is related to a failure of the product, or if a change is required to the product, then there will be no charge regardless of the time committed. Maintenance does NOT cover Solomon support, nor does it cover creating, modifying, or debugging TI scripts. Our services are available at \$125 per hour for support services not covered by the maintenance contract. Maintenance does not cover troubleshooting customization clashes, or client-specific enhancements.
- Fees for support without a Maintenance Contract are \$125/hr, billable in 15 minute increments.
- Expired Maintenance Contracts are subject to substantial penalties for re-instatement.
